AGGARWAL V.

Strong sectors in times of recession – 3, 27

ALSTERS P.L.

PMP (*p*-methoxyphenyl), a versatile *N*-protective group in the synthesis of chiral amines and amino acids – 11-12, 13

B

BEIRNE K.M.

Recover hidden profits from pharma processes – 10, 10

BINI F.

Item-level tracing in the pharmaceutical supply chain through UHF RFID technology – 9, 21

BioPlan Associates

Healthcare and biotechnology in the Middle East – 9, 43

BRUNO J.R.

Doing business by the ocean in New Jersey – 11-12, 4

BULLIARD M.

Buying APIs in China – A risk assessment – 9, 8

C

CHALLENGER C.A.

The new materials science of wound dressings – 4-5, 42

CHANTELL C.A.

Fully-automated, fast conventional synthesis of cyclic peptide drugs – 4-5, 6

CONTO A.

The chemical safety assessment for occupational health. Characterisation of the dose-response for human health and the Risk Assessment – 1-2, 2

D

DE BLASI M.

Item-level tracing in the pharmaceutical supply chain through UHF RFID technology – 9, 21

DE LUCA L.

The chemical safety assessment for occupational health. Characterisation of the dose-response for human health and the Risk Assessment – 1-2, 2

DUBEY R.

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 1 – Principle – 3, 10
Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 2 – Applications – 4-5, 37

DWIVEDI A.

Microwave synthesis: A recent advancement in the field of synthetic

chemistry. Part 1 – Principle – 3, 10

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 2 – Applications – 4-5, 37

Biosynthesis, biological activities, chemistry and dietary sources of some important flavonoids – 7-8, 25

DWIVEDI S.

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 1 – Principle – 3, 10

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 2 – Applications – 4-5, 37

Biosynthesis, biological activities, chemistry and dietary sources of some important flavonoids – 7-8, 25

E

EACHUS A.

Major topics in the pharmaceutical industry for 2009 – 9, 3

F

FEJTL M.

ORAC – An antioxidant determination assay performed on multidetection microplate readers – 9, 29

Frost & Sullivan

Novel vaccines improve potential for European vaccines manufacturers – 1-2, 38

Will the economic slowdown effect the medical imaging business globally? – 1-2, 38

Advances in detection technology drive the European autoimmune disease diagnostics market – 1-2, 39

Frost & Sullivan lauds Toscana Biomarkers' outstanding contributions to the R&D of novel biomarkers for the diagnosis of autoimmune diseases – 1-2, 39

Innovative therapies needed to deal with the rapid spread of cancer in Europe – 3, 31

Insulin pens and growing diabetic community increase market for insulin delivery devices in Europe – 4-5, 22

Europe poised for exponential growth in the digitised medical imaging storage space – 4-5, 22

Affordable and flexible CRM solutions - Key to drive investments from pharmaceutical companies – 4-5, 23

Outstanding healthcare companies in Asia Pacific honored – 6, 11

Rising public awareness promoting acceptance of infection surveillance systems across Europe – 6, 14

Transatlantic regulatory integration of drug approval process vital for the global pharmaceutical

industry – 6, 14

Frost & Sullivan identifies innovative and cost-effective technology as key competitive factor in European medical device market – 7-8, 30

Self-monitoring and POC diabetes tests reveal potential for significant growth, boosting the European diabetes diagnostics market – 7-8, 30

Cellular technology extends the boundaries of e-healthcare – 7-8, 31

Web based patient portals in Europe – 10, 19

Demand for therapies to treat drug resistant HIV strains is increasing – 10, 20

European biomarker analysis market – 11-12, 36

Drug candidates in pipeline offer potential for Parkinson's disease therapeutics market – 11-12, 37

FUENTES G.

Fully-automated, fast conventional synthesis of cyclic peptide drugs – 4-5, 6

G

GANSKE F.

ORAC – An antioxidant determination assay performed on multidetection microplate readers – 9, 29

GUPTA P.

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 1 – Principle – 3, 10

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 2 – Applications – 4-5, 37

Biosynthesis, biological activities, chemistry and dietary sources of some important flavonoids – 7-8, 25

H

Halocarbon Products Corp

Fluorine use expands as companies like Halocarbon Products develop faster and novel routes – 11-12, 8

HERITAGE T.

Enterprise ELN strategies – The future for notebooks – 7-8, 14

HOLY A.

Syntheses of antivirals from the family of acyclic nucleoside phosphonates and their prodrugs – 6, 6

HU G.

Peptide synthesis in pharmaceutical manufacturing – 4-5, 2

I

Indena

Semisynthesis Paclitaxel granted CEP. The first company to receive this Certificate – 7-8, 24

Recent studies on Indena extracts – 11-12, 34
Positive pharmacological and clinical data for chemoprevention on bilberry extract – 11-12, 35

Intelligen, Inc

Training courses from Intelligen – 7-8, 29; 11-12, 38

J

JENSSEN H.

Clinical development of peptide antibiotics – 10, 22

JOHNSON C.

Oncology shows highest potential in high-potency market – 10, 29

K

KAUL S.

Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 1 – Principle – 3, 10
Microwave synthesis: A recent advancement in the field of synthetic chemistry. Part 2 – Applications – 4-5, 37

KAUPPINEN P.

Closing the catalyst cycle – 9, 38

KELLE R.

Efficient production for sustainable animal nutrition – Bacteria at their best – 11-12, 25

KERMANI F.

The Middle East's pharmaceutical temptation – 10, 7

KRECMEROVA M.

Syntheses of antivirals from the family of acyclic nucleoside phosphonates and their prodrugs – 6, 6

KUBODERA N.

Pharmaceutical studies on commercially available active vitamin D derivatives – 4-5, 18

KUHN D.

Actual situation and consequences under REACH – 6, 2

L

LAWRENCE K.

Advances in flash purification – 9, 33

LODYGA-CHRUSCINSKA E.

Compounds containing indole ring – The future of medicine – 7-8, 6

LUBECK S.

Automated packaging of reference standards – 3, 6

M

MAJEED M.

Stilbenols – A class of privileged structures – 10, 2

MCCAFFERY M.

Change control for pharmaceutical excipients – 9, 17

MENAKURU M.

Fully-automated, fast conventional synthesis of cyclic peptide drugs – 4-5, 6

MERIANO E.

The chemical safety assessment for occupational health. Characterisation of the dose-response for human health and the Risk Assessment – 1-2, 2

MIGHALI V.

Item-level tracing in the pharmaceutical supply chain through UHF RFID technology – 9, 21

MISHRA S.

Pharma outsourcing consulting – A need of the hour – 7-8, 2

N

NAGABHUSHANAM K.

Stilbenols – A class of privileged structures – 10, 2

O

ORBAN M.

ORAC – An antioxidant determination assay performed on multidetection microplate readers – 9, 29

OZA P.

Pharma outsourcing consulting – A need of the hour – 7-8, 2

P

PAGE K.

Fully-automated, fast conventional synthesis of cyclic peptide drugs – 4-5, 6

PAPAVASILEIOU V.

The role of single-use systems (disposables) in the development and manufacturing of biopharmaceuticals – 1-2, 14

PARK J.H.

Fully-automated, fast conventional synthesis of cyclic peptide drugs – 4-5, 6

PATEL H.

Fully-automated, fast conventional synthesis of cyclic peptide drugs – 4-5, 6

PATEL R.

Biosynthesis, biological activities, chemistry and dietary sources of some important flavonoids – 7-8, 25

PATRONO L.

Item-level tracing in the pharmaceutical supply chain through UHF RFID technology – 9, 21

PETRIDES D.

The role of single-use systems (disposables) in the development

and manufacturing of biopharmaceuticals – 1-2, 14

PHILLIPS S.

Closing the catalyst cycle – 9, 38

POSSUMATO A.

Pseudo-empirical modeling speeds pharmaceuticals to market – 1-2, 6

PRAKASH L.

Stilbenols – A class of privileged structures – 10, 2

Q

QUAEDFLIEG P.J.L.M.

PMP (*p*-methoxyphenyl), a versatile *N*-protective group in the synthesis of chiral amines and amino acids – 11-12, 13

R

RAMACHANDRAN R.

Automation, robotics and miniaturisation - A three-way relationship – 3, 30

Lab-on-chip: A market snapshot – 6, 10

RAVIKUMAR K.

The recession paintbrush: A picture of health? – 3, 26

RIPKE T.

Ultimate quality control for Sanofi – Aventis through 100% check weighing – 9, 51

Roche Diagnostics

Roche and Axigenesis enter into co-development and marketing agreement – 1-2, 33

Roche NimbleGen partners with Biogen on the development of sequence capture technology for targeted high-throughput sequencing of crop genomes – 1-2, 34

Researchers successfully used the 454 Sequencing System for sensitive detection of HIV tropism – 1-2, 34

Roche NimbleGen microarray technology enables the highest-resolution map of human genome copy number variation – 1-2, 35

454 Life Sciences and Max Planck Institute complete draft 1X sequence of Neanderthal genome – 1-2, 36

A 454 sequencing study reveals new insights in drug resistance and tropism associated with the new HIV integrase and entry inhibitor therapy classes – 3, 18

Analyzing the effect of gene knock-down in real-time using Roche's Xcelligence System – 3, 19

Next-generation sequencing uncovers genetic variation linking type 1 diabetes with enterovirus infection – 3, 22

Roche Nimblegen microarrays selected as technology of choice for the Neuromuscular Disorder-Chip Consortium – 3, 23

Roche honored with a

MarketingSherpa award – 4-5, 26

454 Life Sciences announces comprehensive solution for *de novo* sequencing and assembly of increasingly complex genomes – 4-5, 26

Real-time and dynamic monitoring of virus-mediated cytopathogenicity with Roche's xCELLigence System – 4-5, 27

Roche RT-PCR technology used for TIB Molbiol's H1N1 test – 4-5, 27

A set of firsts: Roche NimbleGen CGH microarrays enable the first maps of genome-wide DNA copy number variation (CNV) in dogs – 4-5, 28

Roche NimbleGen and Sigma-Aldrich collaborate to advance epigenetic research – 4-5, 30

454 Life Sciences celebrates a revolution in genomics - Announces the 454th peer-reviewed publication using the Genome Sequencer System – 6, 18

High-throughput redefined: Roche's new LightCycler 1536 real-time PCR system – 6, 19

The 454 Genome Sequencing System detects a novel virus responsible for South African hemorrhagic fever outbreak – 6, 20

Roche NimbleGen introduces the MS 200 microarray scanner, unleashing the full potential of NimbleGen arrays – 6, 21

Roche and SeqWright collaborate to help elucidate the underlying genetic causes of heart disease – 6, 22

High-resolution digital imaging with Cedex HiRes from Roche Innovatis – 6, 22

Roche Applied Science announces winners of 454 Life Sciences' 10 GB grant program – 7-8, 32

Researchers to decode antarctic ice metagenome with the 454 Sequencing System, to explore the effects of climate change – 7-8, 33

The Research Institute of the Hospital Universitari Vall d'Hebron is the first Spanish health centre to acquire high-performance sequencing technology of 454 Life Sciences – 7-8, 34

Roche and Google.org start initiative for early discovery of new diseases – 9, 46

Roche xCELLigence System for cell analysis to provide predictive mechanistic information for small molecule compounds. – 9, 47

Roche's xCELLigence System for determination of optimal time points for gene and protein expression analysis – 9, 47

454 Life Sciences and Roche NimbleGen announce collaboration with Eli Lilly and SeqWright to sequence genomic regions associated with psychiatric

disease – 9, 48

Analysis of RNA polymerase ii mutants using Roche's xCELLigence System – 10, 14

Roche Molecular Systems research team uses 454 Sequencing System for high-resolution HLA genotyping – 10, 14

Roche Applied Science announces CGX arrays designed by Signature Genomics for microarray-based cytogenetic analysis – 10, 15

Roche NimbleGen arrays help unveil the secrets of insidious potato blight – 10, 16

SAIC-Frederick and Roche enter into a research collaboration on technology advancements for cancer gene sequencing – 10, 17

Norwegian team completes cod genome using 454 Sequencing System – 10, 17

Roche's assay for 2009 H1N1 influenza virus is regularly updated with the latest virus sequences – 11-12, 39

Tricore evaluated Roche's new Magna Pure 96 purification system for research on pathogenic virus and bacteria – 11-12, 39

Roche NimbleGen collaboration with consortium of researchers 'plants the seed' towards our understanding of the complex maize genome – 11-12, 40

New integrated testing strategy for the evaluation of environmental contaminants – with Roche's xCELLigence realtime cell analysis system – 11-12, 41

454 Sequencing Systems and NimbleGen Sequence Capture show promise for genetic characterization of leukemia – 11-12, 42

Eurofins MWG Operon joins Roche NimbleGen's certified service provider program for targeted enrichment and sequencing services – 11-12, 42

ROPELLA P.
How to help your employees avoid failure – 3, 2
Training and transformation – 7-8, 17
Opportunity marketing attracts the best candidates – 11-12, 31

ROSE S.D.
Increasing transduction efficiency – 11-12, 20

RUTJES F.P.J.T.
PMP (*p*-methoxyphenyl), a versatile *N*-protective group in the synthesis of chiral amines and amino acids – 11-12, 13

S -----

SAVIN L.
The chemical safety assessment for occupational health. Characterisation of the dose-response for human

health and the Risk Assessment – 1-2, 2

SCHOEVAART R.
Immobilized bulk proteases in enzymatic resolution. Production of non-natural amino acids with high chiral purity – 4-5, 10

SEIPEL M.
Chemical syntheses and crystallisations at temperatures down to -90°C. Perfect conditions with the new Lauda Integral XT process thermostats – 4-5, 14

SHAPIRO M.
Characterization of unknowns in an NSAID gel formulation via oxymercuration – 7-8, 10

SILETTI C.
The role of single-use systems (disposables) in the development and manufacturing of biopharmaceuticals – 1-2, 14

SINGH J.
Breakthroughs in on-line process particle sizing – 4-5, 33

STEFANIZZI M.L.
Item-level tracing in the pharmaceutical supply chain through UHF RFID technology – 9, 21

T -----

THOMAS S.M.
Stilbenols – A class of privileged structures – 10, 2

TUREK M.
Compounds containing indole ring – The future of medicine – 7-8, 6

TURKINGTON S.
Advances in flash purification – 9, 33

U -----

URATA K.
Molecular engineering of C-3 building block based on glycerol for future Gemini Surfactant with newer functions – 1-2, 10

V -----

VAN VLIET M.
Immobilized bulk proteases in enzymatic resolution. Production of non-natural amino acids with high chiral purity – 4-5, 10

VERKADE J.M.M.
PMP (*p*-methoxyphenyl), a versatile *N*-protective group in the synthesis of chiral amines and amino acids – 11-12, 13

VIANI L.
The chemical safety assessment for occupational health. Characterisation of the dose-response for human health and the Risk Assessment – 1-2, 2
